

Dear Friends at Eudora Brewing Co,

In the beginning of 2019, you generously funded a portion of charity: water's work in Malawi as a Water Project Sponsor. Today, it's time to celebrate! We're thrilled to share your Completion Report and tell you more about the work you've made possible.

100% of your generous donation funded a rehabilitated well with handpump for people living in the Ntcheu district of Malawi.

Thanks to you, we're one step closer to making sure that every single person on the planet has access to clean and safe water. Your donation was part of a \$1,250,000 commitment that funded 161 projects and brought clean water to 63,973 people!

Our implementing partner, World Vision, uses a programming model that prioritizes long-term community partnership. They provide integrated, holistic development in communities for about 15 years, or until they can withdraw support without jeopardizing continued development. To further increase sustainability, the Malawi WASH (water, sanitation, and hygiene) Program focuses on building local capacity for the planning, operation, and maintenance of water sources and household sanitation facilities, such as latrines and handwashing stations. These capacity-building initiatives prepare communities to independently maintain their water sources and sanitation facilities both technically and financially.

It's an honor to present you with this Completion Report. In my role as a Water Programs Manager at charity: water, I oversee our partnership, implementation strategy, and commitments in Malawi. As a result, I've seen how clean water truly changes everything for those in need. Health, time, education, opportunities—they all improve with access to clean and safe water.

Thank you for helping us transform the future for 63,973 people in Malawi. We are profoundly grateful for your support!

Sincerely,

Michaela Walsh
Water Programs Manager, charity: water
